DECODE FINAL CONFERENCE: ABSTRACT

RELATORE	*Emma Campbel and Michael Miller* Aspire-Igen Group – UK
TITOLO	**Digitally native?**
ABSTRACT	The presentation will discuss the perceived levels of digital skills among teachers and students and how they are, or are not, being effectively used. Teachers are very good with incorporating digital technologies into their lessons and engaging students. They are also very good at using digital technologies in their leisure time, but they lack the motivation or knowledge, but not the skills, to use this to their professional advantage. Students and young people are also pioneers in digital technology for social and leisure use, but can often fall short when asked to use these technologies in an educational or professional capacity. Do we overestimate the digital skills of students? Are teachers more digitally skilled than students when it comes to education?
