

What is DECODE?

DECODE (Develop Competences in Digital Era) is an Erasmus+ funded project which explores the digital skills needed by education professionals as technology becomes more commonplace in the classroom.

The **project's main objective** is to contribute to the improvement of schools' digitisation processes. As well as several research reports, the project will develop a number of training resources for education professionals.

The **DECODE Consortium** is composed of seven partners from five European countries: Italy, Finland, Romania, Spain, and the United Kingdom.

Events

The DECODE Final Conference

The **DECODE final conference** will take place at **Link Campus University in Rome**, in May 2019.

During the final conference, the project's overall development has been discussed and all developed learning resources have been disseminated, with particular emphasis given to the outcomes of IO5 "*Testing training model for improving teachers' competence for a digital era*" and the DECODE *Final Guidelines Methodology Guide for Teachers* (IO6).

The event was co-organized by **Fondazione Link Campus University** in collaboration with **CRES-IELPO Università Roma Tre**, **DITES Link Campus University**, **ANP Associazione Nazionale dirigenti Pubblici** e alte professionalità della scuola e **AIDR – Associazione Italian Digital Revolution**.

Outcomes, presentations and abstracts are available on the project's website.
